Medical solutions
for your company

// REFRIGERATED CABINETS

A wide range of specific products for the refrigeration of the medical sector. From laboratory and pharmacy cabinets, to plasma freezers, to blood bank refrigerators to ensure the temperature-controlled storage of drugs and biological materials.

// MORTUARY CELLS

Modular refrigeration systems for anatomical rooms, morgues and funeral homes. From mortuary refrigerators to cells and all the accessories necessary for the preservation of the deceased. In addition to these products, our catalog includes many other equipment for histology, necropsy and anatomy laboratories.

// LABORATORY BENCHES

Modular technical furniture, customizable and designed to adapt to the needs of any laboratory. From wall-mounted solutions to central ones, with and without technical riser, with and without chemical hood, with and without washing unit.

// ULTRA FREEZERS

Precision scientific instruments intended for the preservation of biological samples. Different models to meet the different needs of the user. From vertical to horizontal type, from the model with single compressor power supply to that with autonomous refrigeration system up to 40 hours.

// GROSSING STATION

Grossing stations or cutting stations are tailor-made stations according to the use of the final operator. Each cutting station is built specifically for the sector and / or medical health sector in which it must be inserted.

// DISINFECTION

For cleaning surfaces, rooms and to reduce the risk of proliferation of viruses and bacteria, our catalog offers many solutions, from germicidal lamps to ozonizers and other disinfection technologies.
